

## **San Juan Regional Medical Center Community Reinvestment Grant**

San Juan Regional Medical Center is committed to supporting our communities in a variety of ways. San Juan Regional Medical Center Community Reinvestment Grants will help provide funding for special projects that support or are consistent with their mission, vision and philosophy.

At Bloomfield Schools, Central Primary School is utilizing \$5,022 from a San Juan Regional Medical Center Community Reinvestment Grant, to purchase pedometers for the entire school population.

The pedometers will be used to encourage physical activity in our students, staff and volunteers. The data from pedometers will be used to study health, math, social studies and physical education standards. A walking, jogging, or running club will be established to encourage more steps. Students will learn to track their data and improve their overall health.

Kathy Lund, Grant Coordinator, and Central Primary School would like to say thank you to San Juan Regional Medical Center for their funding and for helping our students learn the impact of their health and how it relates to their academic success.
