

BLOOMFIELD SCHOOLS BOBCATWIFI LOGIN

Below are the instructions for connecting to the BobcatWifi network using an Android Device.

ANDROID

<p>1. Go to “Wi-Fi”. Select the BobcatWifi network and use gobobcats for the password. You will now be connected to the BobcatWifi network but you will not be able to fully view websites and apps until you do the below instructions.</p>	
<p>2. Open Chrome and go to “www.bsin.k12.nm.us”. You will need to navigate to following menu Departments > Technology Services > Wi-Fi Security Certificate. Please read the Wi-Fi Service Agreement and tap the “Download BobcatWifi Security Certificate Here” link.</p>	
<p>3. After you click the link it will ask you what google account you want to use (Choose/ Use your school account). After you select your account it will try and open it with “Certificate Installer”. You will see a message after it tries to install it. Just choose close, but now the certificate should be saved in your google drive.</p>	
<p>4. Go to your Settings app, and click on “Security”. Choose “Advanced” and then “Encryption & credentials”. After you click on that choose “Install a Certificate” and then “CA certificate”.</p>	
<p>5. Once you choose “CA certificate” you will see a screen that says “Your data won't be private”. Choose “Install anyway” (it will ask for your credentials.) It then takes you to your downloads where you should see the cert in your google drive folder. Choose the cert and it will be installed. You are now connected to the internet.</p>
